

# *Sur-Dry* **WATER GLASS**

**Wireless Shoe Dryer**

**Dehumidifier for shoes**  
Adsorbs moisture, odor  
and prevent athlete's foot

- No wires or batteries in operation
- Removes moisture over night
- Indicates when needs recharging
- Water removal capacity is about 50cc per cycle
- Easily recharged
- Never exhausts

**SUR-DRY<sup>®</sup>**

## **Dehumidifying Shoe Stretcher**

**Have refreshing and non-deformed shoes everyday**

- Double-function of dehumidifier and shoe stretcher.
- Suitable for all sizes.
- Adsorbs moisture, odor and prevent athlete's foot
- No wires or batteries in operation.
- Easily regenerated.
- Indicates when regeneration is needed.
- Never exhausts.

Model No: E-150-S

# Electric Shoe Dryer

Innovative shoe dryer for your footwear  
Removes Moisture! Eliminates Odor! Improve Foot Comfort And Health!

## Concept

Prepare yourself a pair of dry shoes with Electric Shoe Dryer, comfortable satisfaction for the day ahead.

## Features

The Electric Shoe Dryer is an innovative device specially designed to remove damp from your footwear effectively with the use of PTC thermal component. Mild warm air circulates and penetrates wet shoes to dry any footwear without fear of shoe shrinkage or stiffness. Most shoe dryers that use a traditional fan heater system on the market might hurt your shoes; Electric Shoe Dryer ensures that your leather and delicate footwear will not be damaged through the drying process.

## Applications

Place Electric Shoe Dryers into your wet shoes and insert the plug into an electric socket to start; drying will start automatically.

## Product Specification

Voltage: AC100V ~ 240V, 50/60 Hz

Material: ABS Plastic with antimicrobial treatments.

Product Dimension: 15 \* 6.5 \* 5 cm

Power: 5 W

Package: 1 Pair / Pack

Ultra-Fresh is a trademark of Thomson Research Associates Inc.

# Dehumidifier Rod

**Comfort for life**

Dehumidifying Rod helps to lower humidity levels by heating the air. This increase in temperature will cause the air to circulate to prevent damage associated with moisture.

## Features

- For indoor use
- 12" size effectively manages humidity levels in confined storage space of 100 cu. ft.
- To heat interior air to increase air circulation and help decrease the risk of moisture damage to valuables.
- Ideal for : Gun safes, cabinets, electronic equipment, or anywhere moisture is a problem.
- Easy for installation and usage.

## Specification

- Voltage : AC 100V-240V, 8 watts
- Material : Steel casing
- Size Length : 12 inches

**Civi-Health®**

## Cordless Mini Dehumidifier

*World's fastest cordless dehumidifier*

### Product Concept

This dehumidifier uses battery-operated fan to draw and direct the humid air through the radiated air passage. This enables the air to contact the desiccants in large surface area, hence removes the moisture quickly and efficiently.

### Product Application

This product is specially designed for the need of preventing mildew and retaining dryness for cabinets and wardrobes. It can be applied in area such as wardrobe, shoe rack, shelf, inside of piano and camera box.

### Product Feature

1. Radiated dehumidifying air passage that removes moisture 12 times faster than conventional dehumidifier.
2. Large accommodating capacity of 1000cc of water that is 2 to 3 times greater than conventional dehumidifier.
3. Electricity saving design that enables usage up to one month during operation.
4. Solid and streamline design for long term usage. The design overcomes environment pollution of conventional consumable dehumidifier.
5. The desiccant re-filling pack is easy to get from the market. Any kind of re-filling desiccants may be used.

### Operational Instruction

1. Place normal Calcium Chloride desiccant into the dehumidifier, the quantity is about 460g.
2. Install two dry batteries (AA×2).
3. When the indicating light starts to illuminate, the dehumidifier is in operation.
4. When the desiccants are consumed, the total water collected is about 1000cc.
5. Pour out the water and re-fill the desiccants to continue dehumidifying process.

### Dehumidifying speed

When the dehumidifier is installed with dry batteries and filled up with desiccants, it can remove 1000cc of water within 5 to 7 days. The dehumidifying speed varies according to the humidity of the environment.

### Spec

1. Dimension: L22×W15×H16cm
2. Material: ABS Plastic
3. Power: Batter DC1.5V×2 (AA×2 or UM-3×2)
4. Capacity: 1000cc

Model No: DE-1000
