## Electric YOGURT MAKER

### Features:

1. One act does it all  
Simply plug into electric socket to operate the machine.
2. No sterilization of the container needs to be done.  
Use the milk bottles as fermentation containers  
to prevent the hassle of sterilization process.
3. Use plain yogurt as a starter (approximately 50cc).  
One can buy plain yogurt at a grocery store.
4. Any 1-liter milk containers can be put  
directly into the Yogurt Maker.

Power: 5W

Voltage: AC 100V ~ 240V

Outer material: ABS plastics

### User's instruction:

1. Open up 1 liter of milk or soybean milk and mix thoroughly with 50cc of ready-made yogurt (starter).
2. Put the bottle of mixture into the Yogurt Maker.
3. Plug it in the electric socket for 8 ~ 12 hours. The time can be varied according to individual's preference.  
The longer the fermentation, the more sour the yogurt becomes.
4. Store the yogurt in a refrigerator to stop fermentation;  
preferably consume it within a week.

Knife Organizer with Grinder Set

\* 本產品不含刀具

## Function Characteristics

1. The knife stand includes a grind-stone; this will sharpen the knife when the knife is pulled out of the stand, therefore keeping it sharp.
2. The grindstone is made of a super hard material : Tungsten Carbide which is not abrasive.
3. The knife stand's material does not absorb water; this avoids the disadvantage of traditional wooden knife stand that easily gets moldy.
4. The knife stand has an easily-opened cover that is convenient to open for cleaning, this avoids the growth of bacteria.
5. The knife stand can be fixed on the wall to provide extra space at the sink area.
6. The base of the knife stand has a water-receiving plate that will keep the table surface clean.
